Hello all:

AmyMarie started her vacation today but she is checking e-mail. I'll coordinate with her and we'll contact Aqua Survey for shuttle vessel availability. Any chance that the OSI vessels will be larger – any space for oversight staff expected in January?

Best regards, Len

Thank you Rob, sounds good. Please ask Kristen to coordinate with Len and AmyMarie the logistics for the event.

Subject: HV Sampling in January - Schedule

AECOM is currently planning to sample the Newark Bay Study Area locations during the first full week of January 2012.

Monday January 7th will be a mobilization day. We will have some staff at the facility helping Gravity and OSI set up the vessels.

Tuesday January 8th will be Newark Bay Northeast and Newark Bay South. Based on the previous schedule, we anticipate an EPA split at Newark Bay South.

Wednesday January 9th will be Kill van Kull and 2 equipment blanks (time allowing). This will be where we collect the field duplicate sample for the Tierra data set.

We are currently working with OSI to obtain vessels and captains that may allow more than 6 passengers (8 people total) so that we can have oversight on the boats. I will keep you informed.

AECOM, please notify the laboratories and staff.

Rob, will you email EPA, or should I?

Thank you all, and have a merry holiday!

Kristen
